

# HOW DO I... TALK TO MY DOCTOR?

The TCM Restoration Program is leading medical changes that will help you live a healthier life and lower your overall out of pocket costs.

Through our unique programs, advocacy efforts and innovative approaches, we are able to provide better health and value for our clients.

Although many providers hear “China” and begin to say no... still others are open minded and are seeking the best treatment options for their clients.

It is at this time when you need to become your own best advocate for your own longterm health.

## Understanding their job...

Physicians today are challenged with being your medical professional and confidant, business owner, caring individual, and so much more. We understand that it is their hope and desire that you are as healthy as possible while they must focus on...

1. Improving your overall health
2. Improving your healthcare experience
3. Making your treatment affordable

Their decisions are based on their own education, published materials they have read, and their own personal experiences so if they have not experienced our program personally...they are apt to be a bit skeptical.

# TCM RESTORATION

In order for you to understand what we do and why we do it you must first understand one of our Founders:

Ruth Lycke was the first American patient to ever seek treatment

in Tianjin, China using Traditional Chinese Medicine.

3 years after a devastating pontine brainstem bleed and secondary stroke she had exhausted all the rehabilitation resources in the US. Not content with her state of "recovery" she sought treatment here.

What she found seemed like a miracle; in three months they returned her balance, feeling on the right side of her body, motor skills to her right hand and arm, cognitive function and at the end of 5 months stable eye sight returned as well.

Over the past 8 years she has helped over 500 people receive treatments in China. Now she has helped to establish the TCM Restoration Program that provides the best treatment for a number of conditions in 5 star hotel setting that allows the client to be in control of their health.

Share with your Physician what you've learned about the TCM Restoration Program and that we focus on curing the disease process or the injury rather than incurring ongoing expensive treatments or taking multiple medications for life.

They will need to understand that we are able to accomplish this differently than western doctors by providing the best environment for the body to heal itself and then assist with the healing process. This is where Eastern and Western medical opinion often differ and experiences are limited.

Unlike other programs that exclude the doctor, we wish to work together with your them, providing whatever documentation or tests that they might require. It will be imperative that we can communicate with them directly. We are happy to pick up the phone, utilize email or what ever means they want to assure them of our goals and purpose.

With that in mind we have a "medical release form" that you will need to complete and return to us. We understand that your doctor is extremely busy and will use email and the latest in technology to communicate with them directly.
