

TCM RESTORATION

In order for you to understand what we do and why we do it you must understand one of our Founders:

Ruth Lycke was the first American patient to ever seek treatment in Tianjin, China using Traditional Chinese Medicine.

3 years after a devastating pontine brainstem bleed and secondary stroke she had exhausted all the rehabilitation resources in the US. Not content with her state of "recovery" she sought treatment here.

What she found seemed like a miracle; in three months they returned her balance, feeling on the right side of her body, motor skills to her right hand and arm, cognitive function and at the end of 5 months stable eye sight returned as well.

Over the past 8 years she has helped over 500 people receive treatments. Now she has helped establish TCM Restoration, that provides the best treatment for a number of conditions in 5 star hotel setting.

STROKE STATISTICS

These figures have been maintained as we have measured the results obtained from all clients that we have seen come to China for stroke restoration.

Improvement in mobility (walking) 95%

- After treatment only 10% require minimal assistance in walking
